

[Opencart Xml Import Pro Nulled Php](#)

A screenshot of the XML Import Pro interface in Opencart. The interface is dark-themed. At the top right, it says "Time until your demo ends: 10:47 | Back to module detail". A notification at the top left says "Import was created". The main content area is titled "XML Import Pro" and has two steps: "1 Import setting" and "2 Tag settings". Below this, there is a green "Import now" button. A "CRON links:" section contains several URLs. A modal window titled "Importing..." is open in the center, showing a progress bar at 35% and a table of statistics:

Part	3/10
Checked products	345 / 1000
Inserted products	345
Updated products	0
Progress	35 %

The modal window also has a "Close" button. In the background, there are buttons for "Add new import" and "Save import", and a note "Demo limit is: 1 000 products." At the bottom of the interface, there is a footer with "© 2014-2015 by DEAWid | Support" and "OpenCart © 2009-2015 All Rights Reserved." A small link at the bottom left says "Need help with XML Import Module? Click Here."
